

Sect 1.2 Practice: Order of Operation

Date _____ Period _____

Evaluate each expression.

1) $2 + 6 - 1$

2) $(5 - 3) \times 2$

3) $(2 \times 2 \times 2) \div 4$

4) $6 + 4 + 5 - 6$

5) $1 + 6 \div (5 - 2) \times 5$

6) $4 + (10 \times 2) \div (2 + 2)$

Evaluate each using the values given.

7) $qm - 5$; use $m = 5$, and $q = 3$

8) $k + 3 + j - k$; use $j = 5$, and $k = 5$

9) $mnp \div 6$; use $m = 6$, $n = 6$, and $p = 2$

Review - Write each as an algebraic expression.

10) twice 11

11) the product of n and 10

12) x less than 13

Review - Write each using words.

13) $m \cdot 7$

14) $\frac{35}{n}$

15) $\frac{48}{z} - 16$

16) $5 + 6x$

Order of Operations Practice — Answer Key

1. 7
2. 4
3. 2
4. 9
5. 11
6. 9
7. 10
8. 8
9. 12
10. $2(11)$
11. $10n$
12. $13 - x$
13. the product of m and 7
14. the quotient of 35 and n
15. 16 less than the quotient of 48 and z
16. 5 more than the product of 6 and x
